

CHS Theatre Course Flowchart

There are lots of options! Follow any path!

THEATRE 1 This is an intro course that covers many, many different areas of theatre, including acting, playwrighting, lights, sound, improv, construction, costumes, and more! This is a great first step in CHS Theatre since you'll experience lots of different topics.

THEATRE 2 This class continues where Theatre 1 left off and goes more in-depth. At the beginning of the semester, we do a survey to find out areas of theatre the group would like to explore, and then we plan the class to match these interests. Theatre 2 may be repeated.

TECHNICAL THEATRE As part of the CHS Career Tech Education program, this class trains students for skills needed to be a technician in the entertainment industry, including topics such as lights, sound, construction, and props. The class also focuses on the skills of successful employees, like communication, collaboration, and creativity.

ADVANCED ACTING/DIRECTING This class is geared toward students who have already shown success in acting or directing through CHS courses or participation in CHS Theatre productions. We focus on interpreting scripts, making strong acting and directing choices, and giving and accepting feedback. A.A.D. may be repeated, and honors credit is available through additional requirements.
